Prerequisites for Publication

Authorship: The Editors of Anatomical Science International adhere to recommendations of the International Committee of Medical Journal Editors [http://www.icmje.org] regarding criteria for authorship.

Accordingly, each person listed as an author or coauthor for a submitted report must meet all three criteria. An author or coauthor shall have:

1. Conceived, planned, and performed the work leading to the report, or interpreted the evidence presented, or both:

2. Written the report or reviewed successive versions and participated in their revision;

3. Approved the final version.

Meeting these criteria should provide each author with sufficient knowledge of and participation in the work to allow him or her to accept public responsibility for the report. **Certification**: This Certification Form should be signed and submitted with the manuscript. The senior or corresponding author is requested to certify that all listed authors qualify for authorship according to the above three criteria. The author(s) should also certify that: no part of the work described has been published before; that the work is not under consideration for publication elsewhere.

Animal and human research: Research involving humans must be carried out in accordance with the Helsinki Declaration of 1964 and all subsequent revisions and therefore must be in accordance with the ethical standards of the responsible committee (institutional or regional). Studies involving animal experimentation must include a statement of compliance with the guidelines as recommended by the Science Council of Japan or the National Research Council's criteria (NIH No. 86-23).

Certification Form – to be submitted with manuscript to Anatomical Science International

Manuscript title:

I/We hereby certify that the work submitted is in full accordance with the statement of "Prerequisites for Publication" for *Anatomical Science International*.
