

Aim and Scope — CHINA FOUNDRY publishes bimonthly to a worldwide readership in English, covers the whole fields of foundry industry for iron, steel and non-ferrous castings, including sand molding casting, die casting, investment casting, etc. It mainly reports advanced scientific and technical achievements, application technology, successful experiences in the production, management and leadership, recent development and industry information.

Manuscript Submission

Submission of a manuscript implies: that the work described has not been published before; that it is not under consideration for publication anywhere else; that its publication has been approved by all co-authors, if any, as well as by the responsible authorities – tacitly or explicitly – at the institute where the work has been carried out. The publisher will not be held legally responsible should there be any claims for compensation.

Permissions

Authors wishing to include figures, tables, or text passages that have already been published elsewhere are required to obtain permission from the copyright owner(s) for both the print and online format and to include evidence that such permission has been granted when submitting their papers. Any material received without such evidence will be assumed to originate from the authors.

Original Articles and Reviews

The word count for the main text (including Introduction, Materials and Methods, Results, Discussion, and Acknowledgements) should not exceed 8,000 words. Manuscripts exceeding this limit will be returned to the author without review.

Source Files

Please ensure you provide all relevant editable source files at every submission and revision. Failing to submit a complete set of editable source files will result in your article not being considered for review. For your manuscript text please always submit in common word processing formats such as .doc or .docx.

Title Page

Please make sure your title page contains the following information.

Title

The title should be concise and informative.

Author information

- The name(s) of the author(s)
- The affiliation(s) of the author(s), i.e. institution, (department), city, (state), country
- A clear indication and an active e-mail address of the corresponding author

Abstract

Please provide an abstract of 150 to 250 words. The abstract should not contain any undefined abbreviations or unspecified references. Standard nomenclature should be used and abbreviations should be avoided. The preferable format should accommodate a description of the study background, methods, results and conclusion.

Keywords

Please provide 4 to 6 keywords which can be used for indexing purposes.

Brief introduction to the first author (or correspondent author):

Brief introduction to the author should contain:

- E-mail address;
- 2. The title of a technical or professional post;
- 3. Research interests; and/or
- 4. Position in professional and scientific associations.

Text Formatting

Manuscripts should be submitted in Word.

- Use a normal, plain font (e.g., 10-point Times Roman) for text.
- Do not use field functions.
- Use the table function, not spreadsheets, to make tables.
- Use the equation editor or MathType for equations.
- Use italic for variables.
- Use of SI units is mandatory. Journal style is to use the form $S \cdot m^{-1}$, $A \cdot m^{-2}$, $W \cdot m^{-1} \cdot K^{-1}$, not S/m, A/m², W/m·K
- Abbreviations should be defined at first mention and used consistently thereafter.

Acknowledgments

Acknowledgments of people, grants, funds, etc. should be placed in a separate section. The names of funding organizations should be written in full.

Tables

- All tables are to be numbered using Arabic numerals.
- Tables should always be cited in text in consecutive numerical order.
- For each table, please supply a table caption (title) explaining the components of the table.
- Identify any previously published material by giving the original source in the form of a reference at the end of the table caption.
- Footnotes to tables should be indicated by superscript lower-case letters (or asterisks for significance values and other statistical data) and included beneath the table body.
-

Artwork and Illustrations Guidelines

Electronic Figure Submission

- Supply all figures electronically. Color illustrations should be submitted as RGB (8 bits per channel).
- For vector graphics, the preferred format is TIFF or EPS; for halftones, please use TIFF format.
- Vector graphics containing fonts must have the fonts embedded in the files.

Line Art

- Do not use faint lines and/or lettering and check that all lines and lettering within the figures are legible at final size.
- All lines should be at least 0.1 mm (0.3 pt) wide.
- Scanned line drawings and line drawings in bitmap format should have a minimum resolution of 1200 dpi.
- Vector graphics containing fonts must have the fonts embedded in the files.

Halftone Art

- Halftone art should not bear the legend “magnification x 100” (or similar). Instead, a scale bar should be superimposed on or inserted in the photographs.
- Halftones should have a minimum resolution of 300 dpi.

Figure Lettering

- To add lettering, it is best to use Helvetica or Arial (sans serif fonts).
- Keep lettering consistently sized throughout your final-sized artwork, usually about 2–3 mm (8–12 pt).
- Variance of type size within an illustration should be minimal, e.g., do not use 8-pt type on an axis and 20-pt type for the axis label.
- Avoid effects such as shading, outline letters, etc.
- Do not include titles or captions within your illustrations.

Figure Numbering

- All figures are to be numbered using Arabic numerals.
- Figures should always be cited in text in consecutive numerical order.
- Figure parts should be denoted by lowercase letters (a, b, c, etc.).

Figure Captions

- Each figure should have a concise caption describing accurately what the figure depicts. Include the captions in the text file of the manuscript, not in the figure file.
- Figure captions begin with the term Fig., followed by the figure number.
- Identify previously published material by giving the original source in the form of a reference citation at the end of the figure caption.

Reference

Citation

Reference citations in the text should be identified by numbers in square brackets. References cited for the first time in a table or figure caption should be numbered as if they appeared in the text where the table or figure is first mentioned. Some examples:

- Negotiation research spans many disciplines [3].
- This result was later contradicted by Becker and Seligman [5].
- This effect has been widely studied [1-3, 7].

Reference list

Only published or accepted manuscripts should be included in the reference list. Meetings abstracts, conference talks, or papers that have been submitted but not yet accepted should not be cited. If available, please always include DOIs as full DOI links in your reference list (e.g. “<https://doi.org/abc>”).

Journal abbreviations

Always use the standard abbreviation of a journal’s name according to the ISSN List of Title Word Abbreviations, see [ISSN.org LTWA](https://www.issn.org/LTWA).

If the **Journal** abbreviation is not known, the journal title should be given in full.

Single-blind Peer-review Process

CHINA FOUNDRY operates a single-blind peer-review system, where the reviewers are aware of the names and affiliations of the authors, but the reviewer reports provided to authors are anonymous. CHINA FOUNDRY strives to complete the peer review of all submitted papers and the publication of accepted manuscripts in a timely manner and to keep the authors informed of any problems with their manuscript, but under no obligation to submit every manuscript to formal peer review. Papers that are judged by the editors or the Editor-in-Chief to be of low priority or inappropriate for publication in CHINA FOUNDRY, may at the discretion of the editors or the Editor-in-Chief, be rejected without formal written reviews by referees. CHINA FOUNDRY attempts to obtain a minimum of two written reviews for each manuscript that is submitted for peer review, although the Editor-in-Chief has the discretion to make final editorial decision about the disposition of a paper with fewer than two reviews.

Scientific Misconduct — Falsification of data, suppression of relevant data, and fabrication of data are considered fraud. Plagiarism and fraud are widely understood to constitute scientific misconduct. Reviewers and readers of CHINA FOUNDRY should report any suspected duplicated publication, plagiarism, falsification to the Editor and the Editor-in-Chief of CHINA FOUNDRY. This includes reporting on the publication of similar or duplicate articles by the same author and of text or figures that appear to have been lifted verbatim or reproduced from the publication of other authors. Upon reviewing such a report, the Editor-in-Chief shall conduct an official inquiry in a prompt, considerate, and confidential manner. The inquiry will thoroughly examine the validity of the charges and the author will be notified in writing of any and all accusations as well as be provided with all relevant documents. The author will be given the opportunity to respond to accusations and CHINA FOUNDRY will conduct all inquiries in complete confidence. Every consideration will be given to protecting the rights and reputation of all concerned. In the case of clear evidence of fraud, plagiarism, or falsification of data, the author's institution will be notified and the authors may be prohibited from future publication in CHINA FOUNDRY.

Important note: the journal may use software to screen for plagiarism.

Article processing fees — CHINA FOUNDRY has an article processing fee (CNY900 per page, and CNY7,200 at most) for Chinese authors. Authors outside China do not need to pay the article processing fee.

Suggesting / excluding reviewers

Authors are welcome to suggest suitable reviewers and/or request the exclusion of certain individuals when they submit their manuscripts. When suggesting reviewers, authors should make sure they are totally independent and not connected to the work in any way. It is strongly recommended to suggest a mix of reviewers from different countries and different institutions. When suggesting reviewers, the Corresponding Author must provide an institutional email address for each suggested reviewer, or, if this is not possible to include other means of verifying the identity such as a link to a personal homepage, a link to the publication record or a researcher or author ID in the submission letter. Please note that the

Journal may not use the suggestions, but suggestions are appreciated and may help facilitate the peer review process.

Online First

The article will be published online after receipt of the corrected proofs. This is the official first publication citable with the DOI. After release of the printed version, the paper can also be cited by issue and page numbers.

Copyright and license term – CC BY

Open Choice articles do not require transfer of copyright as the copyright remains with the author. In opting for open access, the author(s) agree to publish the article under the Creative Commons Attribution License.
