

# Guidelines for Authors of *JETP Letters*

*JETP Letters* publishes short papers that require rapid publication and are of broad physical interest. These papers should report first observations of new physical phenomena or new fundamental theoretical results.

This journal accepts and publishes manuscripts submitted in Russian or English. The total length of any article should not exceed five journal pages. This length approximately corresponds to 25 KB in **LaTeX** format, including 1 KB for each figure. You can estimate the manuscript length more accurately by preparing it according to an example that is available at <http://www.jetpletters.ac.ru> using the style file (`jetp1.cls`).

Manuscripts may be submitted to the editorial board by e-mail to the address at `letters@kapitza.ras.ru`. In this case, each figure should be submitted in the form of an individual file in PostScript (\*.ps), EncapsulatedPostScript (\*.eps), or PaintBrush (\*.pcx) format.

Acceptance or rejection of a manuscript is based on the decision of the editorial board upon recommendation of the editorial board member specialized in the appropriate section. A manuscript can be rejected if it is not topical enough, does not provide considerable development compared to other publications in this field, considers too specific a subject, etc. As a rule, the referee's reports on rejected papers are not sent to the authors. The authors may resubmit a rejected manuscript, appending an explanatory letter to it. In this case, the manuscript will be placed under additional review.

Electronic proofs and the final version of the manuscript is sent to the authors by the publisher.

## MANUSCRIPT PREPARATION

The first page of a manuscript should have the following form:

Title

List of Authors

*Affiliations and Addresses (the e-mail address of one of the authors must be indicated)*

Abstract

Then, after one blank line, the main text follows.

Since abstracts may now be distributed separately from the papers (databases, online systems, etc.), the abstract text should be self-contained with no references or abbreviations but with understandable notation.

Abbreviations must be given in capital letters without periods and should be explained as they are first introduced. Footnotes in the main text must be numbered consecutively in the order of their appearance.

Cited references must be given in a general list at the end of the manuscript and should be numbered with Arabic numerals (e.g., [1]) consecutively as they are mentioned in the main text. The reference to a journal article should cite the following: the initials and surnames of the authors, journal name in CASSI-abbreviated style, volume number (in boldface type), the first page number of the paper, and year enclosed in parentheses. If an article is written by more than four authors, indicate only the first three, e.g.,

1. A. B. Ivanov, V. G. Petrov, I. M. Sergeev, et al., *J. Exp. Theor. Phys.* **71**, 161 (1990).

References to books must cite the following: the initials and surnames of the authors, the complete

book title, and year and place of publication (in the case of translated books, give the information for the original in parentheses). Sample book reference is as follows:

2. L. M. Blinov, *Structure and Properties of Liquid Crystals* (Springer, Heidelberg, 2011).

Use decimal points instead of commas. The vectors with no arrow above them must be given in boldface type.

We recommend that the authors preparing figures electronically adhere to the following rules: prepare figures in the frame; place dashes on the axes inside the figure; when possible, use Times font; use numerals (including those on the axes in an inset) and lowercase letters with a height of 3–4% of the maximum figure size (height or width) of the figures; put units of measure on the axes in parentheses. When preparing a figure, keep in mind that, as a rule, the width of a figure in printing does not exceed 82 mm; in exceptional cases, a figure can be set across the entire width of the sheet (up to 160 mm).

Examples of the preparation of manuscript and figures, as well as style file, are available on the [journal web site](#).
