

Guidelines for Authors of *Journal of Experimental and Theoretical Physics*

Authors of *Journal of Experimental and Theoretical Physics* are requested to comply with the following guidelines.

1. Manuscripts submitted for publication in *Journal of Experimental and Theoretical Physics* must contain original results that have not been published previously and are not under consideration for publication elsewhere. In special cases, topical review articles are commissioned by the editorial board.

2. Manuscripts must be finalized and be concise to the clearest possible extent. No data should be duplicated in tables, figures, and text.

3. Both text and figures must be submitted by e-mail. The text must be formatted as a Microsoft Word or *LaTeX* file; each figure should be submitted as a separate postscript (*.ps) or encapsulated postscript (*.eps) file. The manuscript must be accompanied by an abstract containing a clear and brief statement of the purpose and results of the work. The abstract must not duplicate the Conclusions section.

4. Each page of a manuscript must be typeset in a single column, double-spaced, with a font size of 12 or 14 pt, and with a left margin of at least 4 cm.

Large formulas and equations must be typed on separate lines. Vector quantities must be denoted by boldface characters.

All pages in the manuscript should be numbered. Tables, abstract, references, and figure captions must be typed on separate pages.

Each manuscript must be signed by all authors. The submission should include completed, signed by all authors, and scanned copy of the [copyright transfer agreement](#).

5. Footnotes must be numbered consecutively throughout the manuscript. All references must be enumerated in the order of citation in a single list at the end of the manuscript and referred to in text by indicating their corresponding numbers in square brackets (e.g., [1]). The following examples illustrate reference format:

1. V. B. Berestetskii, E. M. Lifshitz, and L. P. Pitaevskii, *Quantum Electrodynamics* (Nauka, Moscow, 1984).

2. A. M. Sergeev, R. I. Chernova, and A. Ya. Sergienko, *Fiz. Tverd. Tela* **30**, 835 (1988).

3. R. Brewer, J. M. Faber, C. N. Malençon, et al., *Phys. Rev. A* **18**, 1632 (1978).

4. A. N. Stirling and D. Watson, in *Progress in Low Temperature Physics*, Ed. by D. F. Brewer (North Holland, Amsterdam, 1986), Vol. 10, p. 683.

5. K. D. Gromov and M. E. Landsberg, in Abstract of Papers, *X All-Union Conference on Low Temperature Physics, Tashkent, 1986* (Nauka, Moscow, 1987), p. 434.

6. M. P. Elliot, V. Rumford, and A. A. Smith, Preprint TH 4302CERN (1988).

7. L. N. Shalimova and A. S. Kryukov, Preprint No. P1622 (Joint Institute for Nuclear Research, 1987).

8. N. V. Vasil'ev, Candidate's Dissertation in Mathematical Physics (Moscow State Univ., Moscow, 1985).

9. A. Fang, C. Howald, N. Kaneko, et al., arXiv:cond-mat/0404452.

Each figure must be on a separate page and formatted so that all details (particularly in photographs) are sharp and can be clearly understood. Legends to figures should be replaced by numbers and letters wherever possible, with explanations provided in text or in figure captions. The corresponding author will receive proofs by e-mail as a PDF file. Corrected proofs must be returned within three days. The manuscript must be supplemented with the full name, e-mail address and post addresses, and a phone number of the corresponding authors.
