

Guidelines for Authors of *Technical Physics Letters*

Technical Physics Letters is devoted to various aspects of general and applied physics. The journal is published two issues a month.

Together with a manuscript, the authors should submit a scanned copy of the [copyright transfer agreement](#) completed and signed by all authors.

The editorial board of *Technical Physics Letters* asks contributors submitting their manuscripts to obey the following rules. Manuscripts not conforming to these rules are not accepted for publication and are returned for revision.

1. The manuscript should include a cover letter briefly explaining the need to rapidly publish the manuscript in *Technical Physics Letters*. The manuscript must be signed by all the authors. The accompanying material should contain the address, phone number, and e-mail address of the corresponding author.

2. The manuscript length should not typically exceed four standard (21×30 cm or 8.5×11 in) double-spaced pages (plus the list of references and figure captions, both on separate pages) and (typically) two figures. Figures composed of separate independent parts should be avoided. The printed text should be neatly typed, employing the font size of 12 or 14 pt, on white paper with double spacing and ample margins. All pages should be sequentially numbered.

3. The title page should have the following items: the title; the list of authors; their affiliations and addresses (including zip code, city, and country); e-mail addresses; and abstract (not exceeding one-third of a standard page).

4. The figure size must not exceed the standard A4 page size and should contain the minimum necessary amount of details. The resolution of the computer-generated figures should be at least 600 dpi. The figures should contain only notations using letters and numbers; all the necessary explanations should be given in the text or in the figure captions. Tables should give the units of measure for all quantities.

5. Abbreviations, even conventional ones, should be avoided in the text and are unacceptable in the paper title, except for the formulas of complicated chemical compounds. The first use of an abbreviation in the text should be clearly explained.

6. The references must be numbered consecutively in order of appearance in the text and are given in a separate list at the end of the text. References within the text are indicated by numbers in square brackets. The list of references must indicate the initials and surnames of all authors of the source cited (unless there are more than four; in this case, the third author's name is followed by *et al.*) and, for journals, the journal title (in the conventional abbreviated form), year, volume number, issue number, and pages (from first to last); for books, full title, publisher, city, year of publication, and pages. Please check one of the latest journal issues for the format and punctuation in the list of references.

7. The authors may submit a manuscript in L^AT_EX-2 ϵ format. All formulas must be written only using the standard T_EX fonts of the Computer Modern (CM) family and the msam and msbm fonts of the American Mathematical Society (AMS).

8. If the manuscript is sent to the authors for revision to take into account the referee's remarks and suggestions, the revised manuscript has to be returned to the editor within two months. Otherwise, the date of first receipt is not mentioned and only the date of receiving the revised version is indicated.
