

# Guidelines for Authors of *Crystallography Reports*

The editorial board of *Crystallography Reports* asks authors to adhere to the following rules. Manuscripts that do not meet these rules will not be considered for publication.

(1) Only the results of original studies and review articles on all aspects of crystallography can be submitted. An original manuscript should describe new unpublished results that have not been submitted for publication elsewhere.

(2) **Copyright transfer agreements.** The authors should submit two copies of the copyright transfer agreement signed by all authors. Manuscripts without copyright transfer agreements signed by all authors are not considered for publication.

(3) The manuscript should be typed with a 1.5 line space and 14-pt font on one side of a standard A4 (21 × 29.7 mm) paper with a 3-cm left margin, a 1.5-cm right margin, and 2-cm top and bottom margins. All pages should be numbered in the top right corner. The manuscript must be signed by all authors.

(4) Along with the paper copy of the manuscript, the authors should also submit the text file in Microsoft Word or rich text format (\*.rtf). Manuscripts in the form of PDF files are not acceptable. The printed and digital versions must be identical.

(5) The manuscript should be ordered as follows: text of the paper, tables, figure captions, list of references, figures, and information about the authors; all items should be in two copies and on separate pages; tables and figures should not be inserted in the text.

(6) The first page of the manuscript should have the following form: the title of a section in which the manuscript is suggested for publication (the list of sections is given at the end of these guidelines), the title of the manuscript (capitalized with initial capitals and centered), the surnames of all authors preceded by initials, the affiliations of all authors, an email address, and the date of submission; for example:

LATTICE DYNAMICS AND  
PHASE TRANSITIONS

## Computer Simulation of the Premelting Effect

A. K. Ivanov<sup>a</sup>, G. N. Petrov<sup>b</sup>, and E. S. Sidorova<sup>a</sup>

<sup>a</sup> *Shubnikov Institute of Crystallography,  
Russian Academy of Sciences,  
Leninskii pr. 59, Moscow, 119333 Russia  
e-mail: ivanov@ns.crys.ras.ru*

<sup>b</sup> *Moscow State University, Moscow, 119992 Russia*

The manuscript should be preceded by a short abstract.

**Reviews** must be preceded by a table of contents with numbered sections. INTRODUCTION and CONCLUSIONS should not be numbered.

The **text** should be divided into sections with appropriate headings. Excessively long paragraphs should be avoided. Abbreviations used should be identified in parentheses when they first appear in the text.

**Tables** are numbered with Arabic numerals in the order they are mentioned in the text; the number is followed by a caption. All columns in a table should have headings and be separated by vertical lines. Contractions of words should be avoided.

**Figures** should be of high-quality and have captions. The surname of the first author and the figure number should be indicated on the front side of each figure. Any text in figures should be replaced with a letter or number, which must be clarified either in the text of the manuscript or in the corresponding figure caption. Photographs should not be incorporated in the text. The scale of a microscopic image should be indicated in the right bottom corner. If a figure contains several panels (a, b, c, etc.), they all should be placed on the same page.

(7) **The list of references** is presented at the end of the manuscript in the following format:

1. I. V. Ovchinnikov, Yu. G. Petrov, G. I. Ivanov, et al., *Sov. Phys. Dokl.* **29**, 355 (1984).

2. D. E. Williams and D. J. Houpt, *Acta Crystallogr., Sect. B: Struct. Sci.* **42**, 286 (1986).

3. A. I. Kitaigorodsky, *Molecular Crystals* (Nauka, Moscow, 1971).

4. I. I. Sidorov, *Doctoral Dissertation in Mathematical Physics* (Moscow State University, Moscow, 2000).

5. K. A. Subbotin and S. V. Lavrikov, in *Proceedings of the 2nd All-Russia Symposium on Processes of Heat Transfer* (Obninsk, 1997), p. 155.

(8) Manuscripts containing structural data should be supplied with a standard crystallographic information file (CIF). This file should be preliminarily checked by the authors against A, B, and C alerts at the e-mail address [chekcif@iucr.org](mailto:chekcif@iucr.org) or with the PLATON Internet program at <http://www.chem.gla.ac.uk/~louis>.

The editorial board reserves the right to check the CIF and return the manuscript to the authors to correct unreliable information (alert A). The presence of B and C alerts should be supplied with the author's comments.

When the manuscript is accepted for publication, the authors should deposit the crystallographic data (CIF) in:

(i) Inorganic Crystal Structure Database (ICSD) (Karlsruhe, Germany) via e-mail [crysdata@fizkarlsruhe.de](mailto:crysdata@fizkarlsruhe.de) (for inorganic structures). The manuscript should be submitted with the corresponding reference number in the form “CSD no. ...”;

(ii) Cambridge Structural Database at the Cambridge Crystallographic Data Center (CCDC) (Cambridge, United Kingdom) by e-mail at [deposit@ccdc.cam.ac.uk](mailto:deposit@ccdc.cam.ac.uk) (for crystal structures containing at least one “organic” carbon atom). The manuscript should be submitted with the corresponding reference number in the form “CCDC no. ...” The form for depositing a CIF can be obtained automatically from [deposit@ccdc.cam.ac.uk](mailto:deposit@ccdc.cam.ac.uk) with “sendmdepform” in the body of the email message or from <http://www.ccdc.cam.ac.uk>.

The authors should be aware that data submitted will be included in the corresponding databases only upon the publication of the corresponding article.

In addition to the preliminary deposit of CIFs in the above databases, the authors should also send these CIFs to the regional representative of the CCDC—the Nesmeyanov Institute of Organoelement Compounds, Russian Academy of Sciences ([star@xray.ineos.ac.ru](mailto:star@xray.ineos.ac.ru)).

(9) There should be an attachment in two copies with the following data: the full names of all authors, their affiliations, addresses, phone and fax numbers and email addresses. The corresponding author should be indicated.

(10) All manuscripts are edited and may be sent back to the authors for revision and correction. All changes made should be introduced into the corresponding electronic copy of the manuscript. The revised manuscript should be resubmitted within three months; otherwise, a new submission date will be indicated in the publication.

(11) The publisher sends proofs to the authors. No changes or additions in the text or figures from the author’s original are allowed.

(12) The editorial board reserves the right to shorten the text and make editorial corrections in the manuscript.

(13) If the manuscript is rejected, only one copy is returned to the authors.

### List of Sections

1. CRYSTALLOGRAPHIC SYMMETRY
2. THEORY OF CRYSTAL STRUCTURES
3. DIFFRACTION AND SCATTERING OF IONIZING RADIATIONS
4. CRYSTAL CHEMISTRY
5. STRUCTURE OF INORGANIC COMPOUNDS
6. STRUCTURE OF ORGANIC COMPOUNDS
7. STRUCTURE OF MACROMOLECULAR COMPOUNDS
8. REAL STRUCTURE OF CRYSTALS
9. LATTICE DYNAMICS AND PHASE TRANSITIONS
10. PHYSICAL PROPERTIES OF CRYSTALS
11. LIQUID CRYSTALS
12. SURFACE, THIN FILMS
13. NANOMATERIALS, CERAMICS
14. CRYSTAL GROWTH
15. APPLIED CRYSTALLOGRAPHY
16. APPARATUS
17. CRYSTALLOGRAPHIC SOFTWARE
18. HISTORY OF CRYSTALLOGRAPHY
19. JUBILEES
20. MEMORIAL DATA
21. OBITUARIES
22. INFORMATION
