

Note to Authors

Journal Address

Manuscripts for publication should be submitted to the editor-in-chief by uploading the manuscript file to the Springer on-line manuscript submission system. The authors may access the online submission system by visiting the homepage: www.editorialmanager.com/fipo.

Correspondence concerning proofs, reprints and subscription of the journal should be directed to Fibers and Polymers Department, The Korean Fiber Society, 22 Teheran-ro 7-gil, Gangnam-gu, Seoul 06130, Korea.

Authorship and Ethical Issues

Authors should adhere to the practices of their research field and the guidelines of the International Committee of Medical Journal Editors (ICMJE). According to the ICMJE guidelines, all of the following 4 criteria must be met to be considered an author:

- Substantial contributions to the conception or design of the work; or the acquisition, analysis, or interpretation of data for the work; AND
- Drafting the work or revising it critically for important intellectual content; AND
- Final approval of the version to be published; AND
- Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved

The journal is a member of the Committee on Publication Ethics (COPE) and subscribes to its principles on how to deal with acts of misconduct thereby committing to investigate allegations of misconduct in order to ensure the integrity of research. The journal may use a plagiarism detection software to screen the submissions. If plagiarism is identified, the COPE guidelines on plagiarism will be followed.

Scope of Journal

Fibers and Polymers publishes original researches on all aspects of fiber and polymer science, engineering and technology, which have neither been published nor are to be published elsewhere.

Chemistry and Physics of Fiber Materials, Fiber Spinning and Textile Processing, Colorants and Dyeing, Functional Modifications of Fibers and Textiles, Clothing and Apparel Science, Manufacturing and Applications of Nanofibers, Biopolymers and Its Applications, Functional Polymers and Its Applications, Polymer Composites, Smart and Intelligence Materials.

Peer-Review

All manuscripts are treated as confidential. They are peer-reviewed by at least 2 anonymous reviewers selected by the editor. The corresponding author is notified as soon as possible of the editor's decision to accept, reject, or request revision of the manuscript. When the final revised manuscript is completely acceptable according to the format and criteria, it is scheduled for publication in the next available issue. Rejected papers will not be peer-reviewed again.

Manuscripts

The editors welcome regular articles, communications, notes, and reviews. Articles should be comprehensive reports with significant results or conclusions. Communications should be preliminary reports of unusual urgency, significance and interest. A more complete article may be published at a later date. A note deals with a limited subject that requires no further elaboration in the future. Reviews should be critical surveys of progress in specific fields of fiber and polymer science and technology during the recent 5-10 years and should contain new and important information on the subject. The length of both communications and notes must not exceed 2000 words. Manuscripts are usually reviewed by at least two experts. Authors are encouraged to recommend suitable reviewers for their submissions.

Preparation of Manuscripts

Manuscripts must be typewritten using a computer on 22*28 cm or A4 paper with adequate margins. The entire manuscript (including

abstract, references, and figure legends) should be double-spaced. All pages should be numbered consecutively.

References, tables, figure captions, schemes, and figures should be placed in that order at the end of the text. Tables, figures, and schemes should be numbered with Arabic numerals. Original drawings and photographs should be attached to the end of text and authors should indicate the place, where the figures are to be inserted in the text or marginal notations in the typescript.

Unclear drawings and photographs are not accepted for publication.

The text should be written in clear, concise English. Color figures are encouraged if necessary. The electronic version of article provides color figures free of charge, while the print version (hard copy) of article does not provide color figures except for author's request with payment of color production cost. For color printing, US\$ 100 per color page will be charged to the authors.

The name of the corresponding author to whom inquiries about the paper may be addressed should be marked with an asterisk.

Running heads (less than 50 letters) should be placed between the title of the paper and the abstract.

An abstract should be provided for all articles, communications, notes, and reviews. Abstracts should explain briefly the reason for the work, the significant results, and conclusions.

Five or less keywords should be listed after the abstract.

The experimental section should provide clear, unambiguous description of materials, methods, and equipments in sufficient details to permit repetition of the work elsewhere. It is the responsibility of authors to ensure the accuracy of references.

References to the paper should be numbered in one consecutive series. References should be typed in the format specified by Fibers and Polymers (see below) and cited in the text by numbers in square brackets.

Example references:

6. E. Nejad, Ph. D. Dissertation, UMIST, Manchester, 1991.

Nomenclature

Authors should use systematic names similar to those used by Chemical Abstracts (CA) Service and IUPAC. CA nomenclature rules are contained in Appendix VI of the current Chemical Abstracts Index Guide.

Submission of Manuscripts

Manuscripts for publication may be submitted via the Springer on-line submission system (the so-called EM) (www.editorialmanager.com/fipo) by following the instruction for the on-line submission of EM.

Proofs

Galley proofs will be sent to the author who submitted the paper within 3-4 weeks after the manuscript is accepted. Proofs should be checked against the manuscript and returned as soon as possible. A pdf file of the published manuscript will be sent to the corresponding author.

Publication Charge

The publication fee is free. The off-print may be provided if the authors agree to pay the production cost. The authors may ask the production cost to the publisher (The Korean Fiber Society, e-mail: fipo@fiber.or.kr). For color printing, US\$ 100 per color page will be charged to the authors.

Author's Checklist

Fibers and Polymers publishes original research on all aspects of fiber and polymer science, engineering and technology, which have not been or are not to be published elsewhere.

Manuscripts

The editors welcome regular articles, communications, notes, and reviews. Articles should be comprehensive reports of significant results or conclusions. Communications should be preliminary reports of unusual urgency, significance and interest. A more complete article may be published at a later date. A note deals with a limited subject that requires no further elaboration in the future.

Reviews should be short, critical surveys of progress in specific fields of fiber and polymer research during the previous 5-10 years and should contain new and important information on the subject.

The length of both communications and notes must not exceed 2000 words.

Preparation of Manuscripts

- Manuscripts must be typewritten (or reproduced on a high-quality printer) on 22×28cm or A4 paper, one side only, with adequate margins. The entire manuscript (including abstract, references, tables, and figure legends) should be double-spaced. All pages should be numbered consecutively.
- References, tables, figure captions, schemes, and figures should be placed in that order, at the end of the paper.
- Tables, charts, and schemes should be numbered with Arabic numerals.
- Original drawings and photographs should be attached to the end of text and authors should indicate the place, where the figures are to be inserted, in the text or marginal notations in the typescript. Unclear drawings and photographs are not accepted to publish.
- Authors should write in clear, concise English.
- The name of the author to whom inquiries about the paper may be addressed should be marked with an asterisk.
- An abstract should be provided for all articles, communications, notes, and reviews. Abstracts should explain briefly the reason for the work, the significant results, and conclusions.
- Five keywords should be listed after the abstract.
- The experimental section should provide a clear, unambiguous description of materials, methods, and equipments in sufficient details to permit repetition of the work elsewhere.
- It is the responsibility of authors to ensure the accuracy of references. References to the paper should be numbered in one consecutive series. References should be typed in the format specified by Fibers and Polymers and cited in the text by numbers in square brackets.
- Authors should use systematic names similar to those used by Chemical Abstracts Service and IUPAC. CA nomenclature rules are contained in Appendix VI of the current Chemical Abstracts Index Guide.
- Galley proofs will be sent to the author who submitted the paper within 4 weeks after the manuscript is accepted. Proofs should be checked against the manuscript and returned as soon as possible.
