

Applied Mathematics—A Journal of Chinese Universities, Series B (Appl. Math. J. Chinese Univ. Ser. B), founded in 1993, is a quarterly mathematical journal carrying original papers on applied mathematics. It is sponsored by Zhejiang University and China Society for Industrial and Applied Mathematics. It is not a translation of *Appl. Math. J. Chinese Univ. Ser. A* which is in Chinese. The primary goal of this journal is to publish innovative and original research papers in applied mathematics, including applications of theoretical results in practical fields.

Instructions to Authors

- 1 Manuscripts should be in English and typeset in LaTeX. A model of preferred style can be found in <http://www.amjcu.zju.edu.cn/download/model.zip>. The desired order of contents is as follows: title, author(s), abstract, keywords, subject classification as in Mathematical Reviews, main text, appendix, references, affiliation(s) and e-mail address(es) of author(s). Tables and illustrations with labels should be placed in the text in appropriate order.
- 2 Electronic submissions via e-mail to amjcuB@zju.edu.cn are preferred, and both tex and pdf format are needed.
- 3 The title should be descriptive and concise. In addition, an abbreviated title (not more than 60 characters) to be used as a running head should be supplied.
- 4 An abstract should have no more than 200 words and cover the most important results and conclusions. Mathematical expressions and citations to references should be avoided. Please choose 3 to 5 keywords that describe the major points or topics covered in the article.
- 5 Equations and formulas should include the appropriate punctuation.
- 6 All figures (photographs, graphs or diagrams) and tables should be cited in the text and numbered consecutively throughout. All figures must be in eps format. Table caption should be placed on the top of the table, while figure caption should be placed at the bottom of the figure.
- 7 References should be listed at the end of the manuscript in alphabetical order of the authors. Unpublished materials are not to be included in the references. The following examples should be followed:

[1] Z Z Bai, K N Michael. *On inexact preconditioners for nonsymmetric matrices*, SIAM J Sci Comput, 2005, 26(5): 1710-1724.

[2] R A DeVore, G G Lorentz. *Constructive Approximation Theory*, Springer-Verlag, Berlin, 1993.

Abbreviations of cited journals should follow the abbreviations of names of serials used in Mathematical Reviews.

- 8 Paper is accepted under the condition that the same work has not been published and that it is not being submitted for publication elsewhere. After publication, each author will receive one free copy of the issue in which the paper appears.
